313 and only 22,700 are to be rebuilt of brick. The remainder, totalling
185 over a million buildings of all kinds in the rural areas alone will be rebuilt with timber. Urban shelter restoration will also require large amounts of lumber. (In 1946 the "Komintern" woodworking combinat in Bobruisk had milled 36,892 cubic metres of lumber, by October 27, of which 27,000 cubic metres was earmarked for restoration work in Minsk.)

471 Another indication of the current importance attached to the timber
313 industry is the fact that the largest investments in the 1946 state budget for the B.S.S.R. were the 120,514,000 roubles allocated to the timber industry. This represents 28 per cent. of the total capital investments made in the Byelorussian budget for 1946.

Paper and Match Production

289 In 1937 paper production in the B.S.S.R. reached 57,100 tons, or 6.87 per cent. of the total paper production of the Soviet Union, which was 831,600 tons. B.S.S.R. production of paper in 1932 was 28,700 tons, or 6.09 per cent. of the total.

372 Pre-war match production in the B.S.S.R. was 28.9 per cent. of
433 total Soviet Union output. Output in the B.S.S.R. in 1950 is to be 1,550 million boxes, and depends on the restoration of the pre-war factories. One of the largest match and plywood factories in the U.S.S.R. before the war, was the plant at Borisov, which the Germans systematically looted and destroyed. Before the war this factory had eight automatic machines for the production of wood matches, which were then widely exported, some being shipped to the United Kingdom and the U.S.A. Plywood, box shook, and other wood products were also produced. During the war four of the machines were removed to Germany, and the remainder were demolished when the Germans retreated. In June 1946, when the UNRRA Mission to Byelorussia observed this factory, it had one unit assembled from salvaged spare parts; and this unit was producing at the rate of 300,000 pocket-boxes of matches daily. Many processes were being operated by hand.

The plant originally consisted of several buildings, most of which are still either in complete ruins or have only the walls standing, without windows or roofs. Concrete floor foundations remain, with a few imbedded iron bars to which pre-war machinery was bolted. Present operations are carried out in the single building which has been restored, and is covered with a new roof. At present, one-third of the match factory space, and one-fifth of the total floor space is in operation. Present plans call for an output of 600 million boxes a year by 1950, or 1,397,000 boxes a day. Before anything like this output can be achieved, several more buildings must be restored, and additional machinery must be procured. Moreover, the demolished
372 electric power plant adjacent to the factory must also be restored to pre-war capacity. The Mission reported, however, that as at most other factories, building restoration was almost entirely a hand process;
